

.NET Web Developer

Position Overview:

We are seeking a mid-level .NET Web Developer to join our development team. The ideal candidate will have hands-on experience building modern web applications using the .NET framework and strong skills in SQL Server database development.

Key Responsibilities:

- Develop, enhance, and maintain modern web applications using C# and ASP.NET Core / .NET 6+
- Build, maintain, and optimize SQL Server stored procedures, views, and data integration routines
- Implement responsive and user-friendly UI components using .NET Blazor Server, HTML, CSS, and JavaScript
- Coordinate with support and development teams to troubleshoot and resolve technical issues
- Participate in code reviews, testing, and debugging

Required Skills:

- 3–5 years of professional experience with C# and .NET (Core or newer)
- Strong experience with Microsoft SQL Server (T-SQL, stored procedures, performance tuning)
- Familiarity with Entity Framework, LINQ, and REST APIs
- Solid understanding of HTML, CSS, and JavaScript

Preferred / Bonus Skills:

- Experience with Blazor Server or WebAssembly
- Exposure to DevOps or CI/CD pipelines
- Experience deploying and managing web applications using Azure App Services
- Familiarity with Git and Agile development practices

Competitive Salary Range:

The position's salary range is \$100,000 - \$135,000
